

# EVEN CREDIT CARDS EMBED

Partners can now display credit card offers on their site for broader user monetization.

Users can explore and get matched with credit card offers based on their creditworthiness.

Once a user is matched with credit card offers, they can click the CTA button and get redirected to the credit card provider's page for onboarding.

Partners have the ability to decide what branding treatment they want for offers that are populated due to matching logic (i.e: CardGuide Match).
